SUMMARY

Hi, I'm a Software Engineer who loves simplicity, neatness and uniqueness.

Full-stack Developer with 4+ years of experience delivering workflow platforms and enterprise internal tools. Strong background in React, .NET and system integration (SAP, LDAP). In recent years, I have focused on web application development while expanding my expertise in AI to build intelligent.

TECHNICAL SKILLS

■ Programming languages

JavaScript (TypeScript), .Net (C#), Java, PHP

(I'm quite confident that I can catch up with other languages when needed very fast)

■ Front-end

- ReactJS: Hook, Redux, Zustand, React Query, React Hook Form, Yup, Formik, Axios, Vite
- NextJS (TypeScript)
- HTML, CSS, Responsive, SASS (7-1 pattern)
- Semantic, SEO
- Ant Design, Tailwind, MUI, Bootstrap, AG-Grid, Telerik UI

■ Back-end

- Protocols: REST, HTTP(S)
- Frameworks/Libraries: Node.js, Express.js, ASP.NET Core
- OOP, WebSocket (SignalR)
- Databases: MongoDB, MS SQL (Store Procedure, Function, Trigger,...), MySQL, PostgreSQL

■ DevOps

Linux, Docker, IIS

■ Dev Tools

Git, Github, Gitlab, Postman, React Developer Tool, Redux Dev Tool, Figma, VS Code

■ Other skills

Teamwork, present, SEO.

EXPERIENCE

■ VAS Group - VAS Nghi Son | Mar 2023 - Present

Full-stack Developer

- Integrated procurement workflows with **SAP** for master data, purchasing documents, and transaction status synchronization.
- Building the **basic layout**, UX/UI and logic, including projects:
 - **Workflows**: Integrated multiple applications into a website. Create multi-level approval, easy to customize and change process flows.
 - **Procurement Management System**: Architected and implemented an enterprise covering full lifecycle **PR** → **RFQ** → **PO**.
 - **Vehicle Manage**: Monitor the time vehicles enter and leave the factory in Thanh Hoa.
 - **Vehicle Numbering**: Generate queue numbers and randomly assign vehicles to loading positions.
- Designed and developed internal applications for the company and maintaining deployed software (**eDelivery, weighing software, asset management, seal management**).
- Technology used: ReactJS, NodeJS, .NET (C#), MSSQL Server, MongoDB

■ Freelance | Jun 2025

Front-end Developer

Project **Asset management**: Managing the company's equipment and office supplies. Helps identify the location of assets in use and check inventory. Allocate or propose the purchase of appropriate assets.

■ Cuong Khang Informatics | Jun 2021 - Mar 2023

Full-stack Developer

- Programming and developing applications according to customer requirements.
- Maintain and operate the Warranty Repair System deployed to partners (**Phong Vu, Dien Thoai Vui, LaptopOne, Vietfirst, Hai Trieu clock, Alaska, ShopDunk**)
- Technology used: .NET (C#), MSSQL Server, ADO.NET, WebService, HTML, CSS, JavaScript, JQuery

PERSONAL PROJECTS

■ Portfolio

- Website to introduce myself, designed and developed by myself.
- Technology used: ReactJS, SASS (7-1 pattern), Responsive
- Website: <https://kietnm.info.vn>

■ Landing page & Ecommerce

- Introducing products, brands,... And e-commerce. All of them are cloned by me from sample designs on the internet.
- Technology used: HTML, CSS, JS, SASS (7-1 pattern), Responsive, Semantic
- Website:
 - Ecommerce: <https://kietnm-ecommerce.vercel.app>
 - CeloBank: <https://kietnm-landing-celobank.vercel.app>
 - Besnik: <https://kietnm-landing-besnik.vercel.app>
 - Dental Care: <https://kietnm-landing-dental-care.vercel.app>
 - Lesson: <https://kietnm-landing-lesson.vercel.app>

■ CRUD

- demo the basic functions of software applications such as: create, update, delete (validation form with Formik)
- Technology used: ReactJS, NextJS, NodeJS, Vercel Postgres, Formik, Yup
- Website:
 - CRUD with ReactJS: <https://kietnm-reactjs.vercel.app>
 - CRUD with NextJS: <https://kietnm-nextjs.vercel.app>
 - Formik with Yup: <https://kietnm-formik-yup.vercel.app>

EDUCATION

Software Engineering

HUIT - HO CHI MINH CITY UNIVERSITY OF INDUSTRY AND TRADE | 2016 - 2020

- Major: Software Technology
- Level: Good
